

Two new bottled water factories will be built in Kozarska Dubica and Bosanski Brod soon, and the value of these investments amounts to 3.06 million BAM.

The Ministry of Agriculture, Forestry and Water Management of the RS announced a public call for granting concessions for exploitation of groundwater at the spring “Rakovica Bukovica” in the area of Kozarska Dubica, and the investment for this project will amount to 2.06 million BAM.

Moreover, they announced a public call for granting concessions for exploitation of groundwater from the spring “Donja Vrela” in Brod and the value of that project was estimated at one million BAM.

The deadline for submission of offers for the construction of a factory is one month, and both domestic and foreign legal entities or consortia have the right on participation.

In the public call was stated that the concession for water exploitation at both springs will be granted on a period of 30 years. The time required for preparatory works and putting the factory into operation was included in the aforementioned period.
