

EFTs newly built power plant Stanari expects December trial operation test and starting from may 2016 full TPP operation is expected.

EFT group investment of 500MEUR is the biggest greenfield energy investments in the region of West Balkans&SEE. Construction of TPP Stanari is entrusted to Chinese company Dongfang.

According to TPP Stanari technical director Ivica Jakovljevic, some testing is already completed. Trial work should confirm main parameters and functionality of the plant areas. Steam boiler testing is expected mid of November and trial work beginning of December. Coal mine operations are also being underway parallel in order to provide sufficient coal reserves.

EFT has additional investment plans, HPP Ulog is the next project on which the investor will focus in the coming years stated RS government minister Zlatan Kokic.
