

SARAJEVO (Bosnia and Herzegovina)- The energy ministry of Bosnia's Muslim-Croat Federation said on Monday that local developers Kamen-Dent and HB Wind have applied to be issued energy permits for the construction of two wind power plants (WPPs).

HB Wind plans to build the Orlovaca wind park with installed capacity of 42.9 MW and estimated annual electricity production of 99.06 GWh, the ministry said in a statement.

Kamen-Dent is seeking an energy permit for the construction of the 48 MW Kupres 1 wind park with estimated annual electricity production of 139.5 GWh.

The Federation is one of the two autonomous entities that make up Bosnia and Herzegovina. The other one is the Serb Republic.
