

First Wind Mill Set Up in Montenegrin Krnovo Wind Park

The first wind mill has been installed at the Krnovo Wind Park near Nikšić, Montenegro. Construction of the wind power park with 25 wind mills will cost about EUR 120 million. Twenty-five wind turbines will be built in Krnovo, with a total capacity of 72 MW.

The expected annual electricity output is between 200 and 230 GWh, reports Montenegrin national TV.
