

Ahead of **Rio Tinto's** 2023 AGM, London Mining Network has invited community members and activists from **Serbia**, Madagascar and the USA to come to London to speak on their experiences organising against the Anglo-Australian mining giant.

On 5 April, LMN will be hosting an event at the Human Rights Action Centre where our speakers will give their testimony on the harms done by [Rio Tinto](#) in their countries, and how networks of international support can provide redress. Supporters are invited to take part in the event and put questions to the panel.

LMN states: "With Rio Tinto celebrating its 150th anniversary and positioning itself as a [key actor](#) in the transition away from **fossil fuels**, the need to hold this company to account has never been greater."
