

Hidroelectrica achieved the first half of the year a profit of 162MEUR, which is for 42% more compared to the same period last year. At the same time, there has been greater production 9,6 TWh which is 1,1 TWh more than in 2014.

June has brought another positive signal for the company: the amount of profit from interest on deposits exceeded the amount paid as interest on loans.

Hidroelectrica paid 20 of June last of 24 installments related to the declaration of bankruptcy, becoming the only company in Romania in bankruptcy who repaid the debt at nominal value. A sum of 110 million remaining to be paid in the form of installment on loans and credit lines have deadline to 15 September 2021.
