

First activities related to the implementation of Kostolac B3 project will start in few weeks, Serbian Mining and Energy Minister Aleksandar Antic said and announced the promulgation of new law on mining and geological research.

Antic added that the project included the construction of new thermal power station in Kostolac with the capacity of 350 megawatts, stressing that production on Drmno strip mine would be increased from current 8-9 million tonnes a year to 12 million tonnes.
